

Chandan Gowda K S

Ph: +1 88574217469; gowdakeelarashivan.c@northeastern.edu ; [LinkedIn](#)

Experienced Software Engineer and M.S. in Computer Science student at Northeastern University. Over four years of proven success in developing and optimizing backend microservices and enhancing application security using Java and AWS. I am eager to contribute to a challenging Software Engineering co-op position starting January 2026.

ACADEMIC QUALIFICATIONS

MS in Computer Science, **Northeastern University**, Boston, MA

Jan'25 – Present

CGPA: 4 /4

BE in Computer Science, **Nitte Meenakshi Institute of Technology (NMIT)**, Bengaluru

Aug'16 – Aug'20

CGPA: 8.76/10

TECHNICAL SKILLS

Languages: Java, Python, C#

Cloud and DevOps: AWS, Microservices, Terraform, CI/CD

Framework And Libraries: Micronaut, Spring boot, Django, Pandas, NumPy, Angular, Mockito

Databases: MySQL, MongoDB

WORK EXPERIENCE

Senior Software Engineer, London Stock Exchange Group (LSEG), Bengaluru

Aug'22 – Dec'24

- Architected an event-driven processing pipeline that transformed **7.5M+ XML compliance records** into standardized JSON at ~40 records/sec, ensuring high integrity and compatibility for downstream analytics and customer-facing applications.
- Engineered a multi-queue priority routing framework in **Python with AWS SQS and Lambda**, enabling differentiated handling of high-priority KYC/AML screening updates and improving turnaround time for High-priority cases by **35%**.
- Developed scalable microservices in **Java Micronaut**, deployed on **AWS Lambda** with **API Gateway**, to provide low-latency CRUD operations, version management, and workflow integrations for risk-screening data.
- Enhanced performance of Lambda-based APIs by tuning **batch processing** and optimizing cold-start handling, reducing end-to-end request **latency by ~40%** and supporting sustained throughput under large-scale batch loads.
- Hardened system security by integrating **AWS WAF**, **IAM-based** secret rotation, and **TLS** communication across services, lowering security-related incidents by **50%**.
- Collaborated with frontend, workflow management, and distribution teams to maintain dual JSON and XML data flows during the migration phase, ensuring zero downtime and seamless adoption for enterprise banking clients.

Senior Systems Engineer, Infosys, Bengaluru

Oct'20 – Aug'22

- Developed and deployed **RPA bots with OCR capabilities** to extract structured data from PDFs and other unstructured document formats, standardizing outputs for enterprise reporting.
- Automated data extraction processes in Robotic Process Automation (RPA) environments, migrating and re-engineering solutions to improve **processing speed by ~3X**.
- Collaborated with cross-functional teams to integrate structured data outputs into business applications, enhancing accuracy and efficiency of operational processes.

PROJECTS

Doctor Patient Assistant System | *ML-AI, NLP, Google Cloud Platform*

Done as part of a final year college project, it is a doctor-patient assistant system that gives a probabilistic prediction of diseases based on symptoms detected and a questionnaire asked by the bot.

Exploratory Data Analysis on PUBG Game Dataset | *NumPy, Pandas, Matplotlib*

Utilized Python libraries to analyze game dynamics and player behavior, gaining insights through data manipulation and visualization.

Online Examination System | *Django, Python, JavaScript*

A fully-fledged application developed using Python, Flask, and MongoDB can be used to conduct tests for multiple users at the same time. with teacher login and result in exporting features.

Recognition and validation of Faces | *Python, CNN, Digital Image Processing*

Developed a Convolutional Neural Network (CNN) using TensorFlow, achieving 90% accuracy on a test dataset. This project focused on enhancing security and authentication systems, trained on the Google Cloud platform.

ACHIEVEMENTS AND CERTIFICATIONS

- Published a paper in IEEE on the topic of “[Doctor-Patient Assistance System using Artificial Intelligence.](#)”
- Earned [AWS Certified Cloud Practitioner](#) certification, demonstrating expertise in fundamental AWS cloud concepts and services.
- Achieved Automation Anywhere Certified [RPA Professional](#) Certification, showcasing proficiency in Robotic Process Automation.

EXTRACURRICULAR ACTIVITIES

- Participated in various Hackathons and Online Cyber Security CTF and AWS Gameday competitions.
- Active Dota 2 player with experience in competitive events, fostering teamwork, strategic planning, and adaptability.
